

PARADISE FALLS - LED INSTALLATION

Installation Guide & Owner's Manual

WARNING: FOR OUTDOOR USE ONLY

****READ THIS MANUAL BEFORE INSTALLATION OF THE UNIT***

WARNING:

Improper installation, adjustment, alteration, service, or lack of maintenance can cause injury or property damage. Read the installation, operating, & maintenance instructions thoroughly before installing or servicing this equipment.

WARNING:

The Outdoor Plus suggests that our products be installed by professionals that are locally licensed by the authority having jurisdiction in gas piping. Our products should be serviced annually by a professional certified in the US by the National Fireplace Institute (NFI) as Gas Specialists or in Canada by WETT (Wood Energy Technical Training).

GENERAL GUIDELINES

When you choose the Paradise Falls, our GFCI compatible, TOP Bolt Transformer™ is included. You will also receive 2 custom fitted RGB flexible LED lights.

Metal RGB Brackets will already be a part on your Paradise Falls unit. Contact the manufacturer before placing the order if you are interested in custom placement of the LED lights.

Your TOP Bolt™ Transformer is designed to fit up to 4 RGB LED lights. These flexible lights are designed to be waterproof, but the transformer must **NEVER** be submerged in water. This may irreparably damage the transformer.

SELECTING THE LOCATION

The ideal location for the TOP Bolt™ Transformer is near your existing pool equipment. Contact the manufacturer if you plan to install your hi-voltage TOP Feature near a body of water. It is highly recommended to special order an additional extension cord, and adhere to hi-voltage installation procedures for your safety.

If you intend to install your Paradise Falls near an open body of water you must install your hi-voltage Transformer a minimum of 5ft from the edge of the body of water. It is strongly recommended you install your transformer in a lockable weather proof enclosure 10ft from the edge of an open body of water.

Always check local electrical codes as they may be stricter than the national guidelines (NEC).

INSTALLATION & USAGE

First place the flexible LED lights into the appropriate bracket on either interior side of the rain curtain of the Paradise Falls (Fig 1). Be sure the lights are installed with the **groove side down**. You may either slide in the light or snap it into the bracket.

Attach the provided male ends (Fig 2) of the RGB Lights to the female ends (Fig 2) of the TOP Bolt™ Transformer (Fig 3). If you special ordered an extension, you will attach the RGB LED lights to the extension using a Y first and then connect the extension cord to the TOP Bolt™ transformer (Fig 4).

Once you plug in the transformer, thread the wiring through the same side of the Paradise Falls as the access door (Fig 5). TOP LED lights must be operated using The Outdoor Plus App. Follow the instructions on how to set up your LED Lights. You can find the manual ► **LED Lights Control Manual** on our website.
